| **Guidelines for the Presentation of the PhD Research Project** | **Required:** NO |
| **INFO:** | The PhD in Biology aims to promote and support the attendance of young graduates, selected according to criteria of merit to PhD programs at international level, in order to develop high qualification in the field of biology, as well as to promote access to the labour market. |
This project also aims to promote interaction among research centers, with the various interest groups in the field of Biological Sciences, represented by industry and by the public sector.

Specific objectives of the PhD Program in Biology are: I) high qualification, II) internationality, III) promotion of excellence, IV) and the connection between higher education / the world of research and the world of public and private labour.

The didactic activity of the Biology PhD Program is organized in short courses and seminars. Frequency of attendance to these activities will provide PhD students with the required number of credits that will allow the admission to the II and III year of the PhD program. Short courses are defined by at least 3 lessons, one hour each, while seminars consist in single, one-hour lectures. Both short courses and seminars will be held by the academics of the PhD Program or by leading scientists in the subject field. PhD students will be also required to attend the report sessions, presenting their research project as a English written report and as an oral presentation at the beginning of the PhD Program (1st year students), or organizing the progress of their research performed during the first 6 month of each year as a poster presentation (2nd and 3rd year students). At the end of each year of the PhD Program, all the students are also required to submit a final report, written in English, and to present their research data in the form of an oral presentation.
